Site codes found in the schedules section of this release can be decoded by using this table. The sites shown in the above table were active during the current broadcasting season. Sites that are currently inactive have not been listed. Lat/Long of transmitter sites are shown to the nearest minute. For greater detail, including numbers and powers of installed transmitters for any given site, please see the printed edition of WRTH.

Where a '✓' is shown in the 'MW' column, this indicates the site has Mediumwave &/or Longwave transmitters (with a frequency coverage in the range 0.15-1.75MHz) installed.
If there is a '✓' in the 'SW' column, the site has Shortwave (i.e. a frequency coverage in the range of 2-26MHz) capability.

If either column has a '✗', that site does not have transmitters installed that cover the range indicated.
