

WRTH INTERNATIONAL RADIO SCHEDULES - MAY 2018

Notes for the International Radio section

Country abbreviation codes are shown after the country name. The three-letter codes after each frequency are transmitter site codes. These, and the Area/Country codes in the Area column, can be decoded by referring to the tables in the at the end of the file.

Where a frequency has an asterisk (*) etc. after it, see the 'KEY' section at the end of the schedule entry.

The following symbols are used throughout this section:

- † = Irregular transmissions/broadcasts;
- ‡ = Inactive at editorial deadline;
- ± = variable frequency;
- + = DRM (Digital Radio Mondiale) transmission.

Entries in **GREEN** are broadcasters that have commenced operation since the current WRTH was published.

Entries in **RED** have ceased broadcasting on MW/SW since the current WRTH was published.

Stations that were inactive during the previous season, and have remained inactive have been deleted.

Entries marked in **BLUE** have station names that differ from those listed in the current WRTH.

ALASKA (ALS)

KNLS INTERNATIONAL (Rig)

kHz: 6075, 6090, 6185, 7355, 7395, 9560, 9610, 9655, 9710, 9730, 9760, 11885

END OF INTERNATIONAL SCHEDULES

CLANDESTINE & OTHER TARGET BROADCASTS

Clandestine Broadcasts (Clan) are politically-motivated broadcasts produced by groups opposed to the government of the target country.

Other Target Broadcasts can be produced by either governmental or non-governmental organisations, and are targeted at zones of regional or local conflict. Most COTBs are transmitted via the facilities of international transmitter operators.

Country abbreviation codes are shown after the country name. The three-letter codes after each frequency are transmitter site codes. These, and the Area/Country codes in the Area column, can be decoded by referring to the tables in the at the end of the file.

Where a frequency has an asterisk (*) etc. after it, see the 'KEY' section at the end of the schedule entry.

The following symbols are used throughout this section:

- † = Irregular transmissions/broadcasts;
- ‡ = Inactive at editorial deadline;
- ± = variable frequency;
- + = DRM (Digital Radio Mondiale) transmission.
- § = Planned/Under construction, but not yet operational/on air.

Entries in **GREEN** are broadcasters that have commenced operation since the current WRTH was published.

Entries in **RED** have ceased broadcasting on MW/SW since the current WRTH was published. Stations that were inactive during the previous season, and have remained inactive, have been deleted.

Entries marked in **BLUE** have station names that differ from those listed in the current WRTH.

The following symbols are used in the above table:
† Irregular; ‡ Inactive; ± Variable frequency; + DRM
Broadcast (for schedule and to decode other 'Key'
symbols, such as * or ~, see station entry in the
appropriate section).

END OF SELECTED LANGUAGE BROADCASTS

INTERNATIONAL FREQUENCY LIST

May 2018 - World Copyright WRTH Publications Ltd

For country and site codes, see relevant tables at the end of this file. The column 'N' indicates Notes. Symbols used in the 'N' column are: '+', indicating DRM transmissions; '±' which indicates variable frequency; '†' marks an irregular broadcast and '‡' for frequencies that were inactive at time of publication.

Where † is shown after a site name, this indicates that the site was inactive at time of publication (i.e. not being used during the current season). Sites that are marked as inactive may be in a dormant, but potentially usable, state. The site may also be in the process of being constructed or waiting for licensing, etc. It is also possible that some of these sites are being or have been dismantled. Should that be the case, they will be removed from the list when we receive confirmation. To aid clarity those sites have been marked in red. If a site has 'S' after the name, this indicates that the site is either still in planning/under construction, or it has been completed, but is not yet operational.

Where a ✓ is shown in the 'MW' column, this indicates the site has Mediumwave &/or Longwave transmitters installed. If there is a ✓ in the 'SW' column, the site has Shortwave capability. If either column has a ✗, that site does not have transmitters installed that cover the range indicated.
